

# TECHNIQUIP

## *Fiber Optic Annular Ring Lights*

### *Highlights:*

- *Excellent cold light source.*
- *Full annulus for continuous even lighting.*
- *Machined aluminum & anodized for durability.*
- *Can be used in clean rooms.*
- *Complete range of adapters to fit most microscopes.*

TechniQuip annular ring lights, constructed with high quality glass fibers, provide continuous 360° shadow-free uniform illumination of white light for a wide variety of applications. These versatile light guides are ideal tools for viewing and inspection in microscopy, photography and other precision applications that require high resolu-

tion and even levels of illumination. Our light guides are offered in various lengths with stainless steel interlock sheathing standard to provide white light where you need it. PVC sheathing is an available option. Our light guides feature precision machined metal fittings. Custom lengths are readily available upon request.

*Maximize the effectiveness of your microscope equipment.*
